

Louise Kerwin

FdSc Applied Computing

“

It was important for me to stay local whilst studying for my Foundation Degree. By staying local I save money and I can do the same qualification that I would do at University but stay at home.

From studying Computing in College I already had a good relationship with the tutors. All the staff are friendly and really supportive and make the course interesting.

The course covers everything I need to know about Computing and I'm now looking forward to doing my top up year to gain my full degree in Games Design.
