## FdSc Applied Computing

“

Prior to starting the Foundation Degree at West Lancashire College I worked as a service engineer which involved IT work. I have always been interested in computers and decided that I wanted to update my skills and gain a formal qualification. After completing a short IT Essentials course I knew that I wanted to increase my skills. Studying for a Foundation Degree gives me the best of both worlds, everything from design to hardware is covered so there is a range of knowledge to build on. The course is flexible around my full time job and it is great to learn in a new college with great facilities. The tutors are knowledgeable and have been really supportive.

***Returning to education after so long was hard but I'm so glad I did.***

***Learning as an adult is a different experience and well worthwhile.***
