

Charlotte Kershaw

FdA Social Care

“

The course has been fantastic. Being a mature student was daunting at first but I've made so many new friends on the course, all from mixed backgrounds and ages. The group is only small so any support that I need is given on an individual basis.

Now my children are growing up I decided it was time to do something for myself. I've always been interested in working with disadvantaged families and I have been able to gain work experience in this area with Home Start at a First Steps Children's Centre in Skelmersdale. The placement aspect of the course is really interesting and beneficial, it means I can put the knowledge I've learnt into practice.

This course has been life-changing for me. The best advice I can give is to not give up before you try. I'm looking forward to my new career now! ”
